

LIVE DEMO

CERTVALID

Instant verifiable credentials on Merkle tree.

Built with Python, Flask

https://github.com/ranjithbrs/CertValid

CHALLENGE

❓

The Problem

Current Workflow Inefficiencies

"Overcoming traditional operational bottlenecks."

- ❌ Manual processes are time consuming
- ❌ Lack of automated verification
- ❌ Users need a modern solution

SOLUTION

Our Solution

CertValid Architecture

"Instant verifiable credentials on Merkle tree."

- CertValid is a Web Application built using Python, Flask, SQLite.

FEATURES

Key Features

Core Capabilities

"Engineered for high performance and reliability."

- ⭐ Tamper-proof
- ⭐ Fast

MODERN STACK

Tech Stack

Under the Hood

"Python, Flask"

- 🔧 Python

- 🔧 Flask

IMPACT

Impact & Demo

Value Delivered

"Delivering measurable time savings."

- ✅ High impact

ROADMAP

Future Roadmap

What Lies Ahead

"Continuous innovation and feature expansion."

- AI
- Cloud
